PROFESSIONAL SUMMARY

Full-stack web and mobile developer with 8+ years of experience delivering booking platforms, e-commerce stores, landing pages, and AI-powered automations for clients across the USA, UK, Europe, Africa, and Asia. Founder of Afigo-Sam Technology and co-founder of SamPidia. Published n8n workflow creator whose automation templates are used by hundreds of businesses. Combines a scientist's analytical rigor (M.Sc. Industrial Chemistry, nanomaterials research) with hands-on engineering across WordPress/PHP, React Native, Framer, and Rust on Solana.

TECHNICAL SKILLS

- **AI Automation & Integration:** n8n (published creator), Make (Integromat), Zapier, REST API integration, workflow architecture, LLM/AI-model integration (Gemini, Claude, FLUX image generation), Telegram bot commerce, social-media automation (Buffer, Apify)
- **Web Development:** WordPress (custom themes, plugin engineering, MotoPress & Guesty booking integrations), custom PHP, HTML5, CSS3, JavaScript, Framer, Webflow, Wix, OpenCart, PrestaShop, Shopify
- **E-commerce & Payments:** Online payment gateway integration (Paystack, Flutterwave, and international gateways), checkout flows, product catalogs, order automation with Google Sheets
- **Mobile Development:** React Native, cross-platform architecture, offline data sync, native Android (published board game)
- **Web3 & Blockchain:** Rust, Solana smart contracts, decentralized applications (dApps) — incl. a community-savings dApp on Solana
- **Edge & Cloud:** Cloudflare Workers, Cloudflare Workers AI, Cloudflare D1, hosting administration, web security, performance & SEO optimization
- **Databases & Storage:** MySQL, PostgreSQL, Firebase Realtime Database, MongoDB, SQLite
- **Data Analysis:** Origin, Prism, Microsoft Excel

PROFESSIONAL EXPERIENCE

Founder & Lead Developer — Afigo-Sam Technology 2015 - Present

- Founded and run a web and app development studio delivering hotel booking, appointment booking, and e-commerce platforms with full online payment integration across WordPress, PHP, OpenCart, Shopify, and Wix.
- AI Automation: engineered intelligent systems with n8n, Make, and Zapier that bridge third-party APIs and eliminate manual data entry for business clients.
- WordPress customization: crafted bespoke sites using custom PHP with robust security hardening and scalable hosting administration.
- Mobile development: built cross-platform apps in React Native with fluid navigation and offline-first functionality.
- Framer design: transformed design concepts into fast, highly animated, responsive production sites.

- Web3 systems: programmed secure smart contracts and blockchain logic in Rust on Solana.

Freelance Web Developer (Pro Seller) — Fiverr & Upwork 2018 – Present

- Designed and delivered 15+ production client websites for businesses in the USA, UK, Spain, Colombia, Morocco, Slovakia, Vanuatu, and Nigeria (selected projects below).
- Specialized in booking systems and e-commerce: WordPress booking plugins (MotoPress), Guesty channel integration, and end-to-end payment processing.
- Maintained a top-rated seller record with repeat international clients; reviews highlight communication, quality, and on-time delivery.

Workflow Template Creator — n8n Community (@sampidia) 2025 – Present

- Published 5 public automation templates on n8n.io used by hundreds of automation builders.
- Built Telegram storefront workflows selling products via Paystack and Flutterwave payments backed by Google Sheets inventory.
- Built AI content pipelines that auto-generate and publish trending posts for X, Facebook, and Threads using Apify, Gemini, FLUX image generation, and Buffer.
- Built scheduled file-lifecycle automation for Dropbox (automatic cleanup of aged assets).

Examiner — National Examinations Council (NECO) & WAEC 2018 – 2019

- Graded national chemistry examinations for both examination councils.

Quality Control & Technical Field Operator (Internship) — Nigerian Gas Company Limited 2014

- Performed water analysis (pH meter, spectrophotometer, WTW microprocessor photometer, Lovibond AF355 kit) and gas analysis via gas chromatography.
- Managed automated process lines from the Central Control Room and calculated natural gas plant output using Barton charts.

Assistant Presiding Officer (Ad-Hoc) — Independent National Electoral Commission (INEC) 2015

- Conducted biometric voter verification and assisted with sorting and counting of ballot materials.

SELECTED CLIENT PROJECTS

- **Hotel & accommodation booking:** Hotel Casa Escobar & Hotel Botanikal (Colombia), EVA Worldwide Resort (USA), Villa Liptovská Mara (Slovakia), Riad Rodaina (Morocco), Turtle Bay Beach House (Vanuatu), Chalet Flocke (MotoPress), 10680 Rochdale (Guesty integration).
- **E-commerce:** Nano Earth CBD (USA) and Chazzy Creations — full stores with payment gateway integration.
- **Appointment booking:** Dream Stories Hub (Nigeria/UK), Tetrad Opus (USA), O'Rincón de Galicia restaurant reservations (Spain), The Outcasters Improv (USA), Evaspin car sharing (USA).
- **Landing pages & marketing sites:** Investment Property Nottingham (UK), Acme Content Marketing, and multiple Framer landing pages for AI startups, agencies, and trade services.
- **Web3 & AI builds:** Decentralized community-savings dApp on Solana; AI video generator for game developers and VTubers (multi-agent workflow using Seedance, Claude, and GPT Image); edge web apps on Cloudflare Workers, Workers AI, and D1; Android mobile board game.

EDUCATION

M.Sc. Industrial Chemistry — University of Ilorin, Kwara State, Nigeria 2019 – 2023

- Thesis: Green synthesis of copper oxide nanoparticles using *Luffa cylindrica* leaf extract and antimicrobial activities assessment. Supervisor: Prof. Dosumu O. O.

B.Tech. Industrial Chemistry — Federal University of Technology Akure, Ondo State, Nigeria 2010 – 2015

- Dissertation: Assessment of corrosion rate of dissimilar welded metals: gravimetric analysis.

RESEARCH EXPERIENCE

Graduate Researcher — Dept. of Industrial Chemistry, University of Ilorin 2022

- Synthesized copper oxide nanoparticles using *Luffa cylindrica* leaf extract.
- Characterized nanoparticles via FTIR, UV-Vis spectrophotometry, SEM, EDX, and XRD.
- Evaluated antibacterial and antifungal activity using agar well diffusion and poison plate assays.

TEACHING & MENTORING

Teacher — Faith Group of Schools, Ore, Ondo State 2018

- Taught chemistry, physics, and mathematics (grades 9–12); supervised and mentored grade-12 students at the NTA/ETV Children's Science & Technology EXPO.

Teacher — Government Girls Secondary School, Gwarzo, Kano State 2016

- Taught chemistry (grades 9–12) and mathematics (grades 7–9).

Teacher — Aunty Joke Secondary School, Ore, Ondo State 2013

- Taught mathematics (grades 9–12) and computer science (grades 7–9).

PUBLICATIONS & ACADEMIC COMMUNITY

- Reviewer — IOPScience: Advances in Natural Sciences: Nanoscience and Nanotechnology (2022).
- Author — Academia: Assessment of Corrosion Rate of Dissimilar Welded Metals: Gravimetric Analysis (2015).

LANGUAGES

- English — bilingual proficiency (written & verbal). Yoruba — intermediate proficiency (written & verbal).
